As the ultrasonic clamp-on transducers are simply mounted onto the pipe wall outside, the measurement does not require any pipe modifications and does not impair plant availability. With its direct media contact any potential for leaks can be ruled out, offering highest operational safety.

Measurement data you can rely on

With 30 years of engineering experience, FLEXIM sets standards in the field of clamp-on flow measurement:

- Benchmark digital signal processing and evaluation capabilities (up to 1000 measurement signals per second)
- Separating calibrated transmitters and transducer parts based on patented aperture calibration for highest possible accuracy of the measuring system.
- Matched and paired transducers ensuring zero offset and superior low flow performance
- Integrated transducer temperature compensation (acc. to ANUGA/GME ME-ES-3-2017 regulation), for stable measurements independent of changing ambient temperatures.
- Two channels for reliable measurements at challenging applications or simultaneous measurement of two pipes.
- Built-in Noise Trek® Mode for accurate and reliable measurements of liquids with entrained solids or gases as well as internal wet gas compensation (up to LVF of 5%)

Data evaluation made easy

In connection with FLEXIM’s elaborated FluxDiag Software, efficient measurement data evaluation, interpretation and recommendation is as easy as it can get. By downloading measurement data from the meter, FluxDiag offers statistical data analysis and extensive graphical visualization helping to gain an in-depth understanding of the process.

With its excellent reporting options, it is the ideal tool to comply with industry standards for regular verification of existing meters and plant wide flow audits. Precise, flexible and versatile

FLUXUS® F/G60X Series

Portable ultrasonic flow measurement of liquids, thermal energy, gases, compressed air and steam

Welcome to the most versatile and industry-proven portable flow meter

The FLUXUS® F/G60X portable flow meter series is the instrumentation standard in many industries, ranging from the Oil & Gas and Chemical Industry to HVAC, Water & Wastewater, Food & Beverages, Pharma and many more. Independent of the environment and pipe conditions, it assures reliable and timely measurements:

- virtually any liquid – independent of viscosity and temperature (from as low as -31°F up to +1100°F) and even with solid or gaseous entrainments
- virtually any gas – independent of the pressurization, including compressed air and sterile, and not affecting any gas entrainment up to a CF of 50% as well as
- thermal energy flow rates of liquid heat transferring media (steam, heat transfer oils, etc.)

Moreover, based on special FM Class 1, Div. 2 and ATEX, IECEx Zone 2 certified variants, time consuming hot work permits are a thing of the past.

The FLUXUS® F/G60X portable flow meters are the ideal tool for:

- Spot metering for continuous process optimization
- Check metering of existing stationary meters
- Temporary replacement of existing meters
- Fluid flow and thermal energy audits
- Efficiency determination of pumps, heat exchangers, etc.

For liquids: FLUXUS® F60X

The standard FLUXUS® F60X portable liquid flow meter allows for the measurement of virtually any liquid media – from water through viscosity oils to the most demanding such as acids and caustics and up to slurries. In conjunction with the WaveInjector® transducer mounting, the meter can measure liquid pipe wall temperatures from as low as -31°F up to +1100°F.

For liquids and thermal energy flows: FLUXUS® F60X Energy

The FLUXUS® F60X Energy is the portable meter of choice for monitoring of thermal energy flows such as balancing of chillers/heaters, optimization of heat exchangers, etc., meeting a standard flow metering tool for HVAC applications as well as energy efficiency tasks in any kind of industrial environment. In terms of metal and applicable pipe wall temperatures it offers the same possibilities as the standard FLUXUS® F60 portable meter.

For liquids and gases: FLUXUS® G60X

When measuring gas filled pipes, the FLUXUS® G60X portable flow meter is the system of choice. Independent of the pipe’s pressurization and with virtually no limitation in terms of measurable media – even wet gas isn’t a challenge – it is the perfect measuring solution for the oil & gas and chemical industry.

For liquids, thermal energy, gases and compressed air: FLUXUS® G60X CA Energy

Equipped with temperature and current inputs, the product variant FLUXUS® G60X CA Energy is the most versatile multi-tool for various measuring tasks.

For liquids, thermal energy, gases and compressed air: FLUXUS® G601 ST

As the world’s only portable steam flow meter, the FLUXUS® G601 ST is the benchmark of non-invasive clamp-on ultrasonic flow measurement. Engineered for low pressure and low steam temperature applications, it is an ideal companion in various industries ranging from food & beverage to the pharmaceutical and chemical sector. Additionally, it also measures thermal energy and flow rates of virtually any liquid or gaseous medium.

The FLUXUS® F/G60X portable gas flow meters not only cover virtually any gaseous medium, they also include all liquid flow metering capabilities of the FLUXUS® F60 series meter series making them a truly comprehensive tool.

Fit for industrial purpose

With the transmitter residing in a sturdy housing and the transducers and cables being stainless steel armored, FLUXUS® G60X offers unrivalled durability for long-term stable flow measurements. Its internal battery allows for up to 25 hrs. of autonomous measurement.

Solutions for any flow metering application

The FLUXUS® F/G60X portable flow meter series is available in various variants, starting as a liquid flow meter up to a multifunctional meter for non-invasive measurement of liquids, heat flow rates and gases – even including compressed air and steam.

Whereas the FLUXUS® F60X meter series is designed for non-hazardous area related applications, the FLUXUS® F/G60X meter series is ATEX, IECEx Zone 2 (1) and FM Class 2 (1) certified, making them the world’s only portable flow meters with hazardous area approvals.

The FLUXUS® F/G60 portable flow meters are available in various variants, starting as a liquid flow meter up to a multifunctional meter for non-invasive measurement of liquids, heat flow rates and gases – even including compressed air and steam. Whereas the FLUXUS® F60X meter series is designed for non-hazardous area related applications, the FLUXUS® F/G60X meter series is ATEX, IECEx Zone 2 (1) and FM Class 2 (1) certified, making them the world’s only portable flow meters with hazardous area approvals.

FLUXUS® F/G60X Series

Portable ultrasonic flow measurement of liquids, thermal energy, gases, compressed air and steam
Flow Measurement on the go

FLUXUS® F/G60X Series

Welcome to the most versatile and industry-proven portable flow meter

The FLUXUS® F/G60X portable flow meter series is the instrumentation standard in many industries, ranging from the Oil & Gas and Chemical Industry to HVAC, Water & Wastewater, Food & Beverages, Pharma and many more. Independent of the environment and pipe conditions, it accurately and reliably measures:

- virtually any liquid – independent of viscosity and temperature (from as low as -310 °F up to +1100 °F) and even with solid or gaseous entrainments
- virtually any gas – independent of the pressurization, including compressed air and steam, and not affected by gas wetness (up to LVF of 5%) as well as thermal energy flow rates of liquid heat transferring media (water, heat transfer oils, etc.)

Moreover, based on special FM Class 1, Div. 2 and ATEX, IECEx Zone 2 certified variants, time consuming hot work permits are a thing of the past.

Solutions for any flow metering application

The FLUXUS® F/G60X portable flow meters are available in various variants, starting as a liquid flow meter up to a multifunctional meter for non-invasive measurement of liquids, heat flow rates and gases – even including compressed air and steam. Whereas the FLUXUS® F/G60X meter series is designed for non-hazardous area related applications, the FLUXUS® F/G60E meter series is ATEX, IECEx Zone 1 (1) and FM Class 1, Div. 2 (1) certified, making them the world's only portable flow meters with hazardous area approvals.

The FLUXUS® F/G60X portable flow meters are the ideal tool for:

- Spot metering for continuous process optimization
- Check metering at existing stationary meters
- Temporary replacement of existing meters
- Plant wide flow and thermal energy audits
- Efficiency determination of pumps, heat exchangers, etc.

For liquids: FLUXUS® F60X

The standard FLUXUS® F60X portable liquid flow meter allows for the measurement of virtually any liquid media – from water up to highly viscous media such as acids and caustics and up to slurries. In conjunction with the WaveInjector® transducer mounting, the meter even measures process pipe wall temperatures from as low as -310 °F up to +1100 °F.

For liquids and thermal energy flows: FLUXUS® F60X Energy

The FLUXUS® F60X Energy is the portable meter of choice for monitoring of thermal energy flow rates e.g. balancing of heat exchangers, heat pumps and chillers, etc. In conjunction with the WaveInjector® transducer mounting, the meter even measures process pipe wall temperatures from as low as -310 °F up to +1100 °F.

For liquids and gases: FLUXUS® G60X

When measuring gas filled pipes, the FLUXUS® G60X portable flow meter is the system of choice, independent of the pipe's pressurization and with virtually no limitation in terms of measurable media – even wet gas isn't a challenge – it is the perfect measuring solution for the oil & gas and chemical industry.

For liquids, thermal energy, gases and compressed air: FLUXUS® G60X CA Energy

Equipped with temperature and current inputs, the product variant FLUXUS® G60X CA Energy is the most versatile tool for various measuring tasks. From monitoring liquid and thermal energy streams up to gas flow rates – including compressed air – it is the ideal portable measuring system for usage within the framework of plant wide industrial energy audits.

One for all – including steam: FLUXUS® G601 ST

As the world's only portable steam flow meter, the FLUXUS® G601 ST is the benchmark of non-invasive clamp-on ultrasonic flow measurement. Engineered for low pressure and low steam temperature applications, it is an ideal companion in various industries ranging from food & beverage to the pharmaceutical and chemical sector. Additionally, it also measures thermal energy and flow rates of virtually any liquid or gaseous medium.
FLUXUS® F/G60X Series

### Hazardous area protection

- **F60X product variant:** FM Class I, Div. 2 and ATEX, IECEx Zone 2 certified;
- **G60X product variants:** FM Class I, Div. 2 and ATEX, IECEx Zone 1 certified;
- Connected transducers up to FM Class I, Div. 1 and ATEX, IECEx Zone 1.

### Reproducibility

- Liquids: ±0.01 to 3% of reading ±0.02 ft/s
- Gases & Steam: ±0.01 to 5% of reading ±0.02 ft/s

### Flow channels

- Two channels for reliable measurements at challenging applications or simultaneous measurement of two pipe sections.
- Built-in Noise Trek mode for accurate and reliable measurements of liquids with entrained solids or gases as well as internal wet gas compensation.
- In connection with FLEXIM’s elaborated FluxDiag Software, efficient measurement data evaluation, interpretation and recommendation is as easy as it can get.
- By downloading measurement data from the meter, FluxDiag offers statistical data analysis and extensive graphical visualization helping to gain in-depth understanding of the process.
- With its excellent reporting options, it is the ideal tool to comply with industry standards for regular verification of existing meters and plant wide flow audits.

### Data evaluation made easy
